# Research Biography

Amirreza Ghahremani

Dr. Amirreza Ghahremani is an assistant professor of School of Mechanical, Aerospace, and Maritime Engineering at Amirkabir University of Technology (AUT) in Tehran, Iran.

He obtained his undergraduate degree in mechanical engineering from Sharif University of Technology (SUT) in Tehran, Iran. He received MSc and PhD degrees in mechanical engineering from Sharif University of Technology (SUT), too. His PhD thesis was elected as the best thesis of the year in School of Mechanical Engineering and also won the “Best PhD Thesis of Iran” award which is held by Iranian Society of Mechanical Engineering. During his education he was recognized as a "Talented Student" due to his outstanding performance. After graduating PhD with the first rank, he started the postdoctoral fellow under support of “National Elites Foundation”. Later, he was appointed to the School of Mechanical, Aerospace, and Maritime Engineering at Amirkabir University of Technology (AUT) in 2018 as an Assistant Professor.

He is a member of “National Elites Foundation” and also was appreciated by mayor of Tehran (capital of Iran). Due to his research efforts, he was awarded some grants such as "Dr. Kazemi Ashtiani" and "Dr. Chamran". He has been funded by Ministry of Science, Research, and Technology (MSRT) to establish the “Optical Measurement Techniques Laboratory (OMTL)” (2020). After establishment of OMTL he was selected as the supervisor of OMTL because of his experience and effective efforts. He has served on some conference committees and collaborated with peer reviewed journals.

His research interests are in the area of Optical Measurement, Combustion, Energy and Heat Transfer. He has collaborated actively with researchers in several other fields such as Soft Robotics, Micro/Nano Fluidics, and so on.

# Research Interest

My research interests are in the area of Optical Measurement, Combustion, Energy and Heat Transfer. I'm collaborating actively with researchers in several other fields such as Soft Robotics, Micro/Nano Fluidics, and so on.

## WORK EXPERIENCES

Assistant Professor, Biosystems Engineering Department, Tarbiat Modares University (TMU) (2016-Continoued).

Guest Professor, Interdisciplinary Science and Technology Faculty, Tarbiat Modares University (TMU) (2018-Continoued).|

Vice-chancellor of the “Renewable Energy Research Institute-RERI”, Tarbiat Modares University (TMU), Tehran, Iran (2018-Continoued).

Visiting Researcher, Leibniz Institute for Agricultural Engineering and Bioeconomy (ATB), Potsdam, Germany (August 2019-March 2020).

Sessional Lecturer, Biosystems Engineering Department, Tarbiat Modares University (TMU) (2014-2016).

Postdoctoral Research Fellow, Renewable Energy Research Institute (RERI), Tarbiat Modares University, Tehran, Iran (2014-2016).

Guest Editor, Journal of Sustainability, MDPI, 2021. “Adoption of Renewable Energy Technologies (RETs) to Achieve Sustainability”.

Managing Guest Editor (MGE), Journal of Sustainable Energy Technologies and Assessments (SETA), Elsevier, 2020. Special Issue: Feasibility, Efficiency and Sustainability of Renewable Energy Applications in Agriculture (Agrorenewables).

Reviewer of the “Journal of Renewable Energy” (Published by Elsevier).

Reviewer of the “Journal of Solar Energy” (Published by Elsevier).

Reviewer of the Journal of “Agricultural Machinery”, Ferdowsi University of Mashhad, Mashhad, Iran.

Reviewer of the “Journal of Renewable Energy and Environment-JREE” (Published by Iran’s Materials and Energy Research Center (MERC), Tehran, Iran.

Reviewer of the “Iran National Science Foundation”, Science and Technology Vice Presidency, Tehran, Iran.

Reviewer of the Journal of Computational & Applied Research in Mechanical Engineering (JCARME) (Published by Shahid Rajae Teacher Training University, Tehran, Iran.)

Member of Iran’s “Renewable Energy Technology Development Council”, Tehran, Iran.

Member of Iran’s “Biosystems Engineering Association”.

Member of “Solar Energy Association of Iran”.

Member of “Renewable Energy Association of Iran”.

# Research Group CV

**Guest Speaker:** Vertical Diffusion Solar Stills: Technology and Developments. International Conference on Smart Advanced Material Science & Engineering Applications. Department of Physics, K.L.E.F., Guntur, Andhra Pradesh, India. Affiliation: K L University (2020).

**Specialized Workshop:** Applications of Photovoltaic Solar Energy Technology in Agricultural Sector. Ministry of Energy, Renewable Energy, and Energy Efficiency Organization (SATBA), Tehran, Iran (2020).

**Inviter Talk:** Applications of Solar Energy Technologies in Agricultural Operations; in GUJCUST-DST sponsored Webinar “Solar Energy Application in Present Era”, Mechanical Engineering Department, Government Engineering College Patan, India (2020).

**Keynote Speech** on “Emergence of Photovoltaic Solar Technology and Its Role to Achieve Sustainability in Agriculture”, *International Conference of Energy, Environment, and Health Engineering (EEH2020)*, UK.

**International Seminar** on “International Seminar on Photovoltaic Thermal Hybrid Solar Collectors; Principles and Techniques”, University in Guntur, India (2020).

**Plenary talk** on “Point-focus Concentrating Solar Power Generation: Challenges and Prospects”, Innovative Applied Energy (IAPE, 2019). Oxford city, United Kingdom.

**Lecture** on “Solar Thermal Desalination Systems” in Professional Seminar of “Unconventional Water Recourses, Challenges and Opportunities”, Iran’s Organization of Country’s Water Resources Management (2018).

**Plenary talk** on “Solar Thermal Desalination Systems: Challenges and Prospects”, Renewable and Sustainable Energy: Sustaining Sustainable Energies for Sustained Growth, Paris, France (2018).

**Lecture** on “Food, Water and Energy Nexus”, Seminar Organized by SERA, an NGO of Environment Conservation, Rasht, Iran (2018).

**Workshop** on “Mendeley Reference Manager” (2017), Tarbiat Modares University, Tehran, Iran.

Trainer of the [Renewable Energy and Energy Efficiency](#) and [PV Business Development](#) programs, by the [Renewables Academy AG \(RENAC\)](#), based in Berlin, Germany.

Trainer of the “[Introduction to power systems](#)” online programme, by the [Renewables Academy AG \(RENAC\)](#), based in Berlin, Germany.

# Books and Book Chapters

# Research Group Interest

## FIELDS OF INTEREST

- Renewable Energy Applications in Agriculture (AgroRenewables).
- Solar Photovoltaics (PV);
- Solar Thermal Photovoltaics (PVT);
- Solar Desalination, Water Purification Technologies, Drinking Water Quality.
- Solar Greenhouses, Solar Dryers, Agrophotovoltaic (APV).
- Modeling and Simulation of Energy Systems.
- Energy and Exergy Analysis.

# Group Research/Industrial Projects

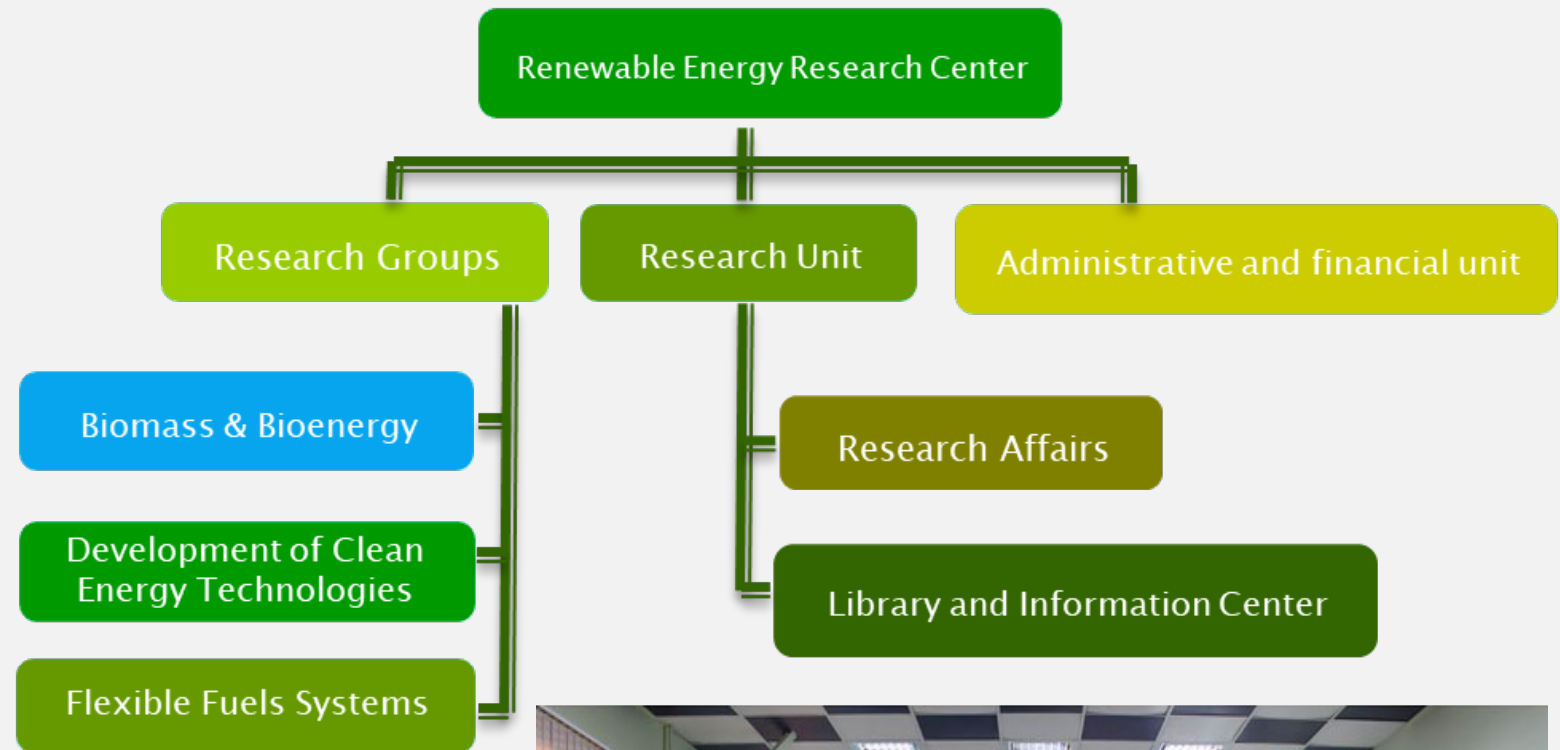

## PROJECTS

Design and Development of a Hybrid MED-RO Desalination System Using a Solar CHP System to Produce Drinking Water. Under Financial Support of the “Semnan Regional Water Company”. **Completed in 2019.**

Development of a Solar Powered Membrane Capacitive Deionization System (Under Financial Support of Iran National Science Foundation, PI: **Shiva Gorjian**)- **In Progress**

Development of a Stand-Alone Spray-Assisted Solar Thermal Desalination System (a joint work between Iran and India, PI: **Shiva Gorjian**)- **Completed in 2020.**

## Education

Highschool: Farzanegan 1  
(national organization for  
development of Exceptional  
Talents)  
Bachelor of Science:  
biotechnology - Alzahra  
university - Tehran

## Summary

A 22 YEARS old, biotechnology student with a bachelor degree focused on biotechnology and Biological Sciences. Experienced in fields including : stem cell culture and differentiation , genetic engineering, gene cloning , transfection, genetic manipulation. Highly skilled in molecular biology techniques. Have Work Experience as a Research assistant in cell & genetics & enzymes and bioinformatics related areas .

## Skill Highlights

- PCR
- Blotting
- FISH & CGH array
- Bacteria/ cell culture
- Chromatography
- Macromolecules Probing
- Self Disciplined
- Creative/ critical thinking

## Experience

### Educational Consultant

#### Tazkie Highschool (October 2016- june 2017), tehran

- helping students in biological fields by answering their questions and teaching them how to study efficiently.

### Trainee and Lab assistant-

#### Shahid Beheshti Research Center (October 2017- july 2018) ,tehran

my researches were focused On bacteria related researches, genetically modifying them and analysis changes in antibiotics sensitivity and resistance, pestiferous and other genetic mutations after a succession of cultivations

#### CoFounder and chief scientific officer (January 2018- June 2018)

- Working part time on my knowledge based Start Up in field of in health science

### Trainee and lab assistant

#### Pastuer Institute of Iran in Regenerative medicine and

#### Biomedical innovations Laboratory (july 2018 – January 2019), tehran

- Working in areas related to Stem Cell cultivation and differentiation with different cultures like DMEM, RPMI.
- Differentiate fibroblasts and faced with teratomas. iPSCs and tissue specific cells and Mesenchymal stem cells.
- making solutions, cultures and MEF by myself.

### Researcher

#### Alzahra University Laboratory (September 2018 – June 2019)

- extraction and purification of recombinant Reverse Transcriptase enzyme as my bachelor Thesis.
- Working with Ecolie BL21, Ecolie DHSa, PET 28 vector, T7 lac promotor, IPTG, SDS PAGE.

#### ResearcherAlzahra University Laboratory (Aguste 2019 –january 2020)

I start working in R&D Of a Company in the field of synthetic food on yeast and soy bean protein extraction . I do research on different types of enzymes and enzyme assays and methods of protein extraction, purification.

# Research Group CV

I am graduated from University of Vienna in 2015 in the filed of GIS and Remote Sensing.  
Since 2015 I am a member of Geography department in Ferdowsi University of Mashhad.  
In our department we have many education and research fields include: Geomorphology, Geography and Tourism Planning, Climatology, Geography and Urban Planning, Geography and rural planning and Political geography which I have collaborations with them.

# Research Group Interest

Based on broad research possibilities in our department, my research interest are:

Land cover/land use change

Natural hazards (floods, landslide, ...)

UAV and Drones applications

Renewable energies

Applied GIS and Remote Sensing and spatial analysis (urban planning, geomorphology, tourism, biodiversity, climate, rural planning, political geography, passive defense and ....)

# Group Research/Industrial Projects

- Project Leader (2020-2021) Re-engineering wet waste collection processes with an emphasis on service pricing.
- Project Leader (2019-2021) Spatial planning of public libraries in Khorasan Razavi province.
- Researcher (2018-2019) GIS in Khorasan Razavi Province. National Aerospace Center.
- Researcher (2009) Site Selection Based on Passive Defense in Iran, University of Malek Ashtar, Tehran.
- Project Leader (2009) Passive Defense Spatial Zoning in Iran, University of Malek Ashtar, Tehran

# Group Supervised Labs

Supervisor: Current MSc students: 2 students in geomorphology; 1 in Tourism.

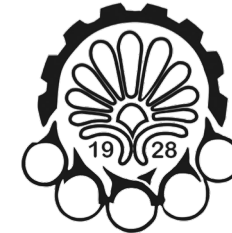

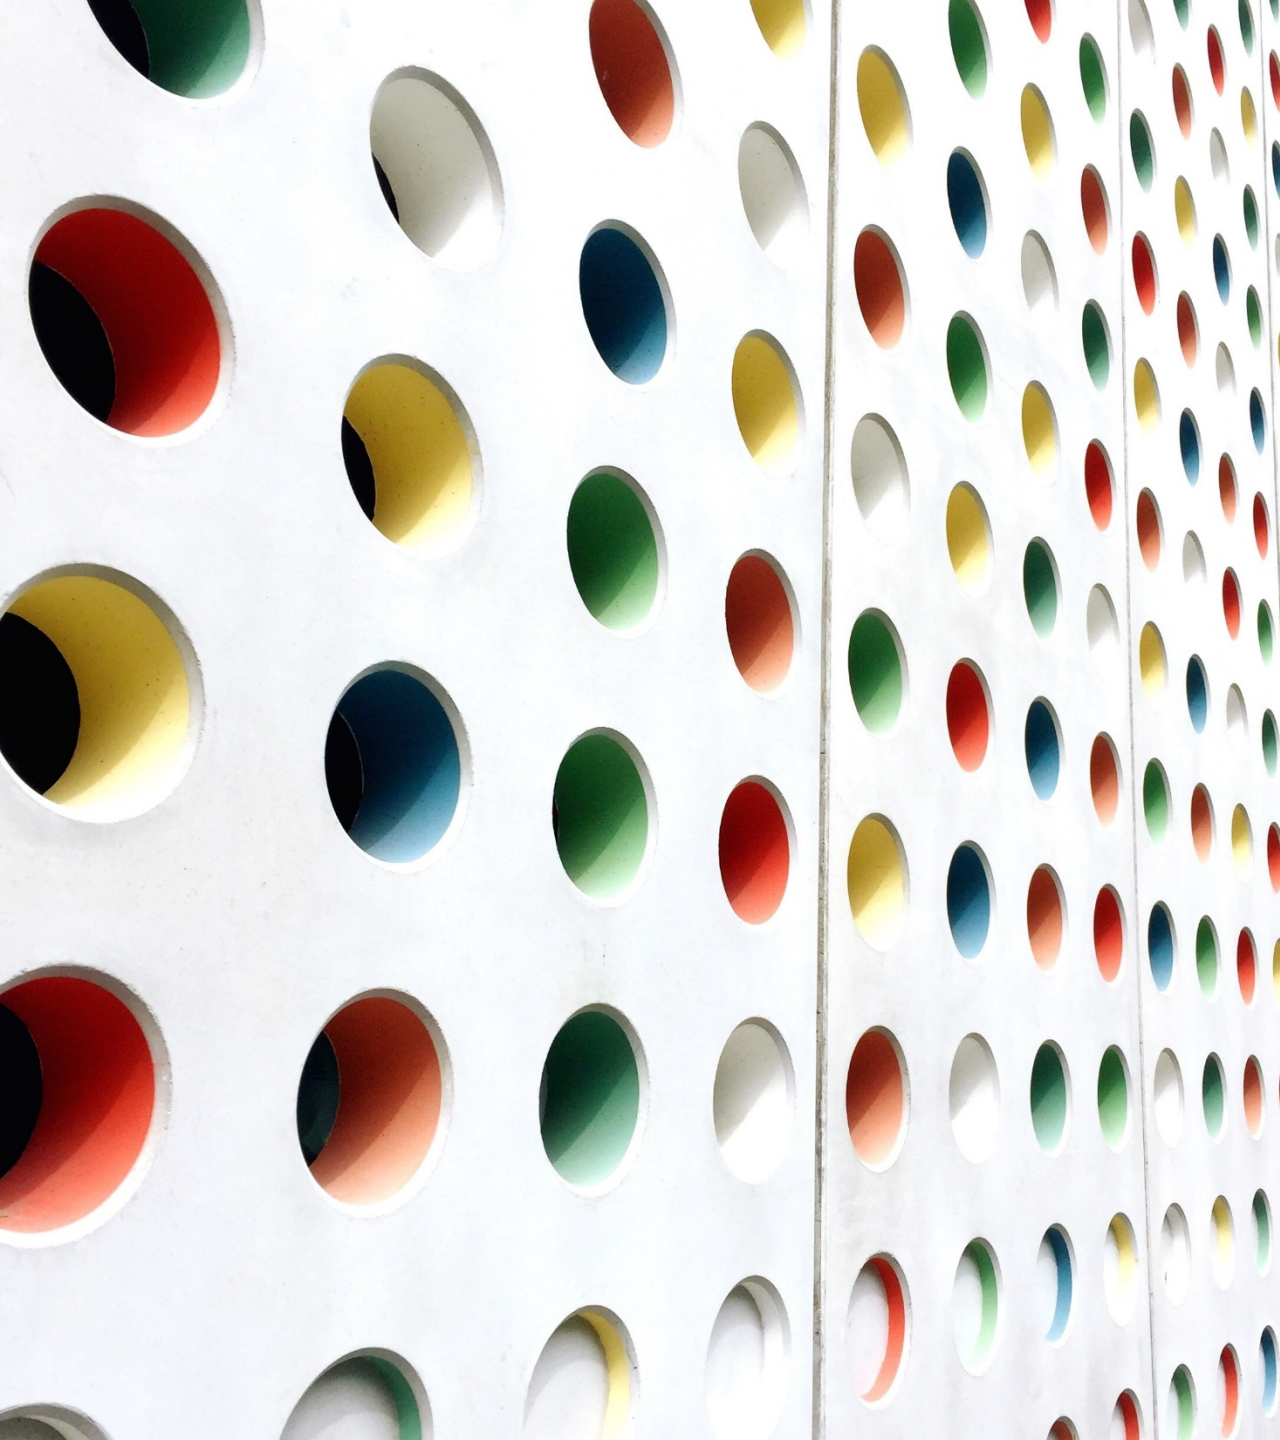

Graduated Master students: 9

Current PhD students: 3

Adviser of Postdoctoral researcher: 3 open position.

## **Coupled Geochemical and Geomechanical Investigation of Carbonate Geothermal Rock to Optimize Saline Water Injection:**

Water injection into carbonate geothermal or hydrocarbon reservoir has gained wide interest under the concept of enhanced geothermal systems (EGS) or enhanced oil recovery (EOR), to maximize productivity from conventional resources and to provide sustainable energy development. The need for improved understanding of injection problems such as injectivity impairment versus time, plugging of injection well and evolution of permeability and fracture conductivity has become critical to optimize injection design. Chemical interactions between the rock, injection brine and formation brine coupled with stress-induced changes in mechanical rock properties and mineral precipitation/dissolution have a major impact on reservoir mid and long-term performance. However, they remained largely unexplored due to the lack of dynamic geomechanical experiments under reservoir pressure and temperature conditions. In the present research proposal, stress dependent permeability and capillary pressure under saline water injection are studied in carbonate rock specimen from the selected geothermal reservoir at German basin, experimentally on the micro-scale and macro-scale by means of X-ray computed micro-tomography and isothermal triaxial coreflooding cell. The novelty of the present method is dynamic geomechanical property measurement under the impact of geochemical reactions during saline water coreflood injection. The method is designed to evaluate and predict the dissolution/precipitation mechanism and the consequent fine detachment and mobilization in porous media under confining stress conditions, resulting in well plugging. At the next phase, a coupled geomechanical-geochemical simulation in micro and macro-scale will be validated based on experimental observations to examine and predict the permeability evolution in at the vicinity of the injection well. The results will assist chemical composition optimization of saline water injection for development of geothermal reservoir.

Projects and Research Activities		
Year	Funder	Description
2019-2023	EPFL Switzerland SUDAC – <a href="#">swissuniversities</a> development and cooperation network	Cluster of Cooperation between MENA and Swiss universities on Digital Education and Research
2019-2022	Iranian Ministry of Energy, West Energy Company (Iran, Tehran)	Design and Implementation of MEMS Accelerator for Power Plant Vibration monitoring
2018-2022	Switzerland SUDAC – <a href="#">swissuniversities</a> development and cooperation network	Partner of Research international Project. Title: MOOLs - Massive Open Online Laboratories.  Project Managers: Dr. Denis Gillet- Dr. Christophe Salzmann EPFL, Ecole Polytechnique Fédérale de Lausanne, Dr. Fariba Moghaddam, HES-SO/Valais - University of Applied Sciences and Arts Western Switzerland.
2019-2019	TUM- Germany	Extending distributed optimization topics in hybrid systems and its application in energy systems.

2019-2021	Iran Grid Management Company (IGMC)	Analysis of Iran Electricity Market Challenges
2019-2021	Iran water and Power Resource Development Company	A MILP model and solution for Economic Assessment of Optimal Pumped Hydro Storage Capacity
2016-2018	Iranian Ministry of Energy, West Energy Company (Iran, Tehran)	Manager of Research Project, Title: Design and implementation of Manipulator cleaner robot for insulator washing in H.V power line.
2017-2019	INSF (Iranian National Science Foundation )	Manager of Research Project, Title: Fuzzy Type 2 Identifiers for energy Systems
2014-2016	Iranian Oil Pipeline and Telecommunication Company (Tehran-Iran)	Manager of Research Project, Title: Modeling of Induced currents in Oil pipelines due to nearby power lines.
2013-2013	Amirkabir University of Technology (Tehran, Iran)	Vice President of Fair, 3th International Conference of Control, Instrumentation and Automation.
2013-2015	National Petrochemical Company, (Mahshahr, Iran)	Partner of Research Project, Title: Design and Implementation of a BMS in a Typical Building in Petrochemical Company. Manager of Research Project: Dr. <u>Heidar Ali Talebi</u> , <u>Amirkabir University of Technology</u>

2000-2002	Iranian Ministry of Energy, Niroo Research Center, (Iran, Tehran)	Manager of Research Project, Title: Modeling and identification of steam turbine (Shahid Rajaee Power Plant).
2001-2002	Iranian Ministry of Energy, Niroo Research Center, (Iran, Tehran)	Researcher of Research Project, Title: Modeling and identification of governor (Bisotun Power Plant).
2001-2002	Iranian Ministry of Energy, Niroo Research Center, (Iran, Tehran)	Researcher of Research Project, Title: Modeling and identification of steam turbine (Bisotun Power Plant).
2008-2010	Imam Khomeini Oil Refining Company,	Manager of Research Project, Title: Fault detection of pump in Arak oil refining company using artificial neural networks.

# Research Group: Nexus & Circularity

## Areas of Research Projects and Topics:

- Circular industrial cities and industrial ecology (3 industrial cities around Tehran)
- Water-Energy-Food-Soil-Climate-sustainability Nexus & Circularity (many potential research topics)
- Mapping Paris Agreement onto circularity and circularity onto national climate plan (both in terms of NAP and NDC)
- NDC and NAP Partnerships
- Nexus Greenhouses (IOT, Carbon sequestration, Net negative carbon footprint, Minimized water footprint, maximizing productivity, reuse of TWW) Demonstration Project proposal for South Tehran Wastewater Treatment Plant

# Research Group: Nexus & Circularity

## Areas of Research Projects and Topics:

- MRV (emissions, mitigation and support) of energy intensive industries (One pilot in each energy intensive industry)
- Developing a standardized and harmonized methodology for assessment of ecological foot print of life style (As a multilateral as well as regional collaborative research project)
- Lake Urmia basin rehabilitation roadmap as a pilot of transitional pathway to sustainability (demonstration project)
- IKI, H2021, GCF, etc. joint climate related projects

# Laboratories

- ▶ Nexus is a concept of interconnectedness of system of systems (SOS) and by nature it is complex and multidisciplinary. Hence, our Nexus & Circularity Committee is a unique team composed of a very diverse group of top scientists from different disciplines and from different universities and institutions of research and government. It also includes representatives from NGOs to enable it to intervene in complex problems of governance, policy, technology, methodology, business plans and training in a nexus innovative manner.
- ▶ In each problem, the scientists and institutions in our committee will strengthen the already impressive capacity within the AUT by providing access to the facilities and laboratories in possession of their institutions as needed in each research scope with priority and under preferred conditions.
